

No Sew Blankets

What you need:

- Fleece material (1 yard will make 1 large blanket or 2 small blankets)
- Scissors (fabric scissors work best)

Directions:

1. Cut your fleece to the desired size
2. With your scissors, go around the edges of your blanket and cut 2 inch wide and 4 inch long strips.
3. Cut the corner strips out. You won't need them!
4. Go around again and cut each of the wide strips in half.
5. Tie each pair of strips into double knots. If your blanket starts to bunch up, gently tug and pull the sides straight.

That's is! You're done!

Tips on blanket sizes:

For small to medium animals: 24 inches by 24 inches

Large animals: 36 inches by 36 inches
